Important -

1. In order for your group to be able to push your group branch to the main repository – I will have first to invite every group member to be contributor to the main project. I thought I could skip this step this term since I made the repository public, but I was mistaken.
2. Please complete as a group the form **as soon as possible**. Once you have collected the info from all of your group. Submit **it through Moodle** (only one submission per group).
3. Once I have received the submission, I will send out GitHub invitations so that you can join the repository as a contributor. Once accepted, you will be able to push the changes from your branch to the main branch.

If your group could provide the following info:

Group #: 1

Repository name your group is working on (please indicate with an "X" in the 1st column

X	**OpenTracksConcordia**
	OSMDashboardConcordia

GitHub information for each of your group members
